

NOTE:

1. To check form with field ID = 3, which was the email, we removed the email validation aspect just to test the form itself.
2. The forms for log in have an unlimited length, so the only error would be if the user was not signed up yet which is part of the data validation.

Page Name	Form ID	Field ID	Expected Values	Test ID	Test Value	Pass/Fail
Signup	sign.textInput	1	string < 81	field.1	a	Pass
Signup	sign.textInput	1	string < 81	field.2	82 A's	Fails
Signup	sign.textInput	1	string < 81	field.3	**.)	Pass
